Time-lapse Photography

Sophisticated Equipment

On-line Gallery:

Instantly access your private gallery, via secure login, to view and download project photos anytime, anywhere, on any device.

Hi-Res Photos:

Hi quality DSLR cameras capturing up to 24Mp images to ensure exceptional results for your media requirements.

3G/4G Connectivity:

State-of-the-art intervalometer enables seamless capture and uploading of photos, remote monitoring and configuration of the system. Status alerts provide up-to-date feedback to ensure continuous system operation, resulting in little or no downtime.

Time-lapse System:

Fully self-contained unit with Hi-res camera, smart controller/intervalometer and lithium-ion battery all contained in a IP-66 weather-proof housing. Battery kept charged by solar panel and AC adaptability available where required.

Nowhere To Attach The Camera, No Worries!

We can provide poles and fixing infrastructure to accomodate most situations.

What Are The Benefits

- Individual logins for off-site managers and other key stakeholders to view progress via the on-line gallery.
- Save time and money with less site visits.
- Access to 1000's of photos for project reports, publicity and social media sharing.
- Provides a photographic history of site activities and aids site security.
- Images instantly uploaded and backed up to protect your investment.
